

Frugie Wash™

Concentrate

Fruit & Vegetable Wash

16 oz. (480 ml)

Frugie Wash™ is an all-natural product designed to help clean fruits and vegetables of synthetic pesticide and chemical residues used during farm production. Unlike common synthetic, additive-laden soaps and detergents, Wysong Frugie Wash contains natural ingredients, and rinses away easily and completely.

Directions: Shake well and remove cap from self-measuring bulb. In upright position, gently squeeze bottle to fill bulb (1 oz.). Mix with water in 16 oz. spray bottle. Spray Frugie Wash™ solution onto the fruit or vegetable to be cleaned. Allow solution to remain on produce 5-10 minutes if possible. Scrub, then rinse well and wipe before eating. Produce may also be soaked. Add 1 oz. of Frugie Wash concentrate to 1 quart (32 oz.) water, allowing product to soak for approximately 15-30 minutes. Scrub, rinse well and wipe before eating.

Note: Some forms of pesticides, hormones, or other chemicals penetrate into the produce and may be impossible to effectively eliminate without removing the skin. Additionally, certain substances used in modern agricultural practices are systemic, and thus might be found throughout the fruit or vegetable. Organic is best. Contact Wysong for further information.

Ingredients: Purified Water, Protein-Fatty Acid Condensate, Soy-Based Lecithin, Food Grade Hydrogen Peroxide, Citric Acid, Ascorbic Acid, Lemon Juice.
