

excess, but do not rinse.

Suggested Usage: Use after meals as a brushing dentifrice and as an edible or rinseable carry-with-you tooth and mouth rinse. For best results, after brushing swish around in mouth and between teeth for several minutes. Spit out

tongue to scrub the teeth with the powder.

Wysong Probiodent™ is made entirely of safe, beneficial

ingredients that have been proven to help decrease tartar,

prevent cavities, mineralize teeth, harden enamel, and freshen

breath. Use with a tooth brush as a part of a regular dental

hygiene program, and also, if brushing is inconvenient, as

a mouth rinse and cleansing agent by simply using the

PROBIODENT™
