

 WellSpring™

Mineral-Enhanced
Alkaline-Ionized
Purified Water Catalyst

- CONCENTRATE -
(must be diluted with water)

16 fl. oz. (473.12 ml.)

WellSpring™ is a purified, concentrated source of electron-rich alkaline ions and minerals. The resulting water enhancement can promote health in countless ways by combating the effects of the overly acidic modern diet (request literature).

Directions: Shake well and remove cap from self-measuring bulb. In upright position, gently squeeze bottle to fill bulb. (Bulb holds approximately one ounce.) Pour this amount into one gallon of pure water and mix well. For further alkalization, add more in increments, until the desired pH of your water is achieved. (Use Wysong pH Indicator Tape™ for pH measuring.) Refrigerate WellSpring and WellSpring-water mixtures if stored for a prolonged time.

Ingredients: Purified, Alkaline-Ionized, Mineral-Enhanced Water, Coral Calcium, Magnesium, Potassium and Other Essential Trace Minerals.
