

Zymase enzymes are designed to be taken with meals to replace enzymes that are lost in processed or home cooked foods. Being fragile nutrients, they will be destroyed if introduced into hot-to-the-touch foods. Sprinkle on foods after they have cooled, or mix with drinks or cold foods at meal time. The dose for each meal need not be applied to all foods. Include Zymase, a concentrated blend of food enzymes from vegetarian sources, in a well-rounded, varied diet of fresh, whole, natural foods. Each enzyme category assists in the digestion of a different food group: Amylase for carbohydrates, protease for proteins, lipase for fats, and cellulase for cellulose.

Dosage: Average dosage is 1/4 to 1/2 tsp. per meal, which equals approximately 2 to 4 shakes.
